

Phongphisit Phumin

Tel: +66 0993849619 | E-mail: phongphisit1988@outlook.com

SKILLS

Frontend: JavaScript, HTML, CSS, React JS, React Suite CSS

Backend: C#, Node.js, Express,

Database: MySQL, SQL Server

Other: GitHub Actions, Gitlab CI, Postman, ChatGPT, Gemini, Claude

EDUCATION

Chiang Rai Rajabhat University

Bachelor of Science (B.Sc.) | Major: Computer Science | Cumulative GPA: 3.35/4.00

PROFESSIONAL EXPERIENCE

Triple J Software and Consulting (Bangkok, TH)

August 2025 - May 2026

PMO and Sap Support (FI-CO Module)

Accomplishments:

- Enhanced SAP FI-CO model services for university and hospital sectors, ensuring high system availability and optimized performance.
- Streamlined financial workflows for healthcare and academic institutions, significantly reducing manual processing time and improving overall operational efficiency.
- Engineered automated tax management solutions to resolve complex compliance issues and minimize human error.
- Managed end-to-end system implementation, from initial configuration and data maintenance to successful project delivery.
- Provided post-Go-Live support and expert troubleshooting, ensuring seamless system adoption and high user satisfaction.

CANA Enterprise (Bangkok, TH)

March 2023 - July 2025

Junior Full Stack Web Developer

Accomplishments:

- Developed and deployed robust internal and external auditing systems tailored for government agencies, ensuring compliance and enhancing institutional transparency.
 - Engineered advanced tax data management modules, integrating new functionalities to streamline taxation processes for large-scale public sector projects.
 - Designed and implemented a specialized budget management sub-system, digitizing paper-based workflows to minimize human error and achieve a significant reduction in physical documentation.
 - Modernized data infrastructure by migrating legacy paper records into centralized databases, improving data integrity and accessibility across departments.
 - Architected scalable Microservices and high-performance RESTful APIs, utilizing complex Stored Procedures to ensure dynamic, end-to-end data synchronization between frontend and backend.
-

ADDITIONAL INFORMATION
